

YOUR MATRIX OF COLOUR, SIZE AND STYLE

In today's apparel market, retailers and consumers push for lower prices, better quality and quicker delivery. To stay ahead, the apparel industry has responded with technology, innovative systems and information. SIMMS meets these challenges with our leading edge Apparel Inventory Software solutions that will help you compete and grow profitably today and in the future.

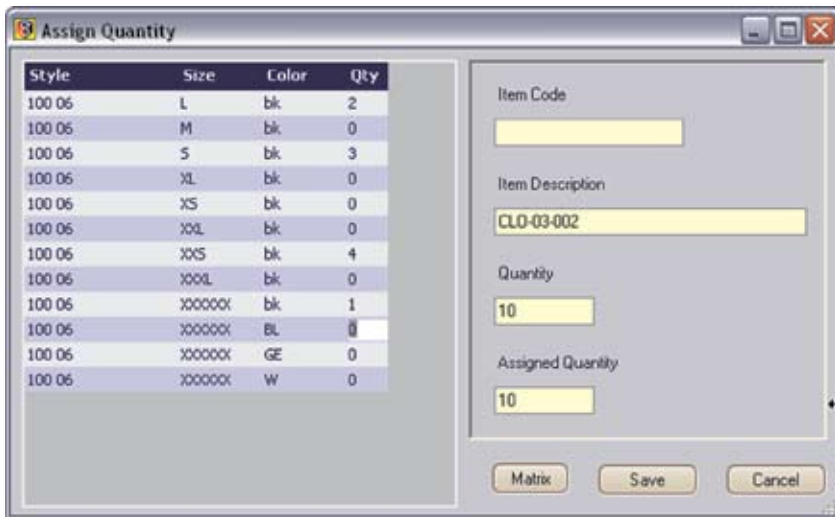

The SIMMS Apparel/Embroidery Software is designed to help apparel manufacturers, importers and distributors remain competitive and meet the demands of quick response, just-in-time and tight margins. Our apparel clients include manufacturers, importers and distributors of men's and ladies' fashion and sportswear, children's clothing, leisure wear, lingerie, foundation garments, swim wear, jeans, t-shirts and furriers.

WHAT SIMMS CAN DO FOR YOUR BUSINESS

- Helps you remain competitive
- Assists you to minimise costs
- Maximises margins

The Inventory Software you can rely on

APPAREL MATRIX MODULE FEATURES

Effectively manage apparel and footwear styles using one item number with multiple colour and size labels with the Apparel Matrix Inventory

Colour and size labels may include National Retail Foundation (NRF) codes. Once defined, colour and size labels may be grouped to form colour cards and size charts that, in turn, may be used to create matrix templates. Templates, groups and labels may then be assigned and tailored to meet individual inventory items, after which all quantities associated with that item will be tracked by colour/size/style.

Assign your apparel and footwear style/colour and size combinations their own unique cost and price

You can assign your apparel items a different cost and price for every style, colour and size combination. This enables SIMMS the power to reflect the appropriate cost and price for each item with its related style, size and colour combination within your purchasing and sales documents.

Timely and Accurate Apparel Information

Your business requires timely and accurate information on inventory location, movement and valuation in order to control and safeguard your inventory. SIMMS is specifically designed to ensure exactly that. From data pertaining to the receipt of goods, the movement of goods within or between locations, the sale, removal or other disposition of goods, and the precise valuation and status of goods remaining in inventory at any time, down to the exact style-size-colour, SIMMS will enable you to successfully manage your apparel/embroidery inventory.
