

## CAPITALISE ON THE GLOBAL ECONOMY

Our optional SIMMS Multi-Currency module delivers powerful and comprehensive multi-currency accounting, purchasing and sales functions. Sophisticated currency management and seamless transactions in any number of currencies provides a global competitive edge. For businesses that operate in multi-currency zones, an optional Point of Sale module is available that allows sales to be made in any currency and payment to be accepted in any mix of currencies.

### Multi-Currency Features

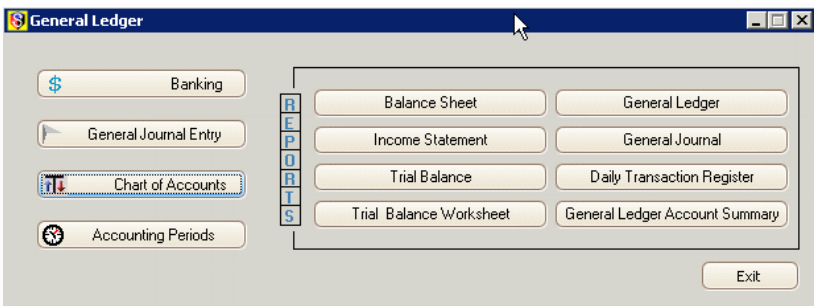

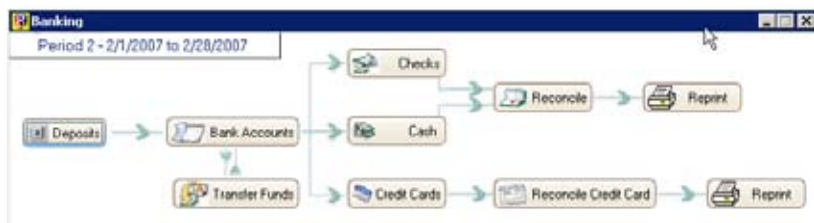

- User-defined exchange rates
- Ability to print reports in both functional and source currencies
- Complete support for the Euro, as well as full EMU accreditation
- Override default currency and exchange rate definitions at the transaction level
- Ability to process payments or receipts in any currency
- Comprehensive currency revaluation to restate outstanding source currency balances and transactions as exchange rates fluctuate

### WHAT SIMMS CAN DO FOR YOUR BUSINESS

- Use SIMMS software to trade anywhere throughout the world
- Simplifies international transactions
- Process payments or receipts in the currency of your customers and vendors

The Inventory Software you can rely on

Upgrades for SIMMS as they are released. You will always have the latest, most current version of SIMMS.

### Pre-paid Support

Purchase a block of support service time to ensure the smooth operation of your system on an ongoing basis.

- Override the default defined customer currency on-the-fly during a POS ticket.
- Your customer can now pay in whatever currency you have pre-configured in SIMMS, this enables you to process payment for part of a customer sale in one currency and select an alternate currency to pay the remaining balance owing.
- SIMMS POS will let you know how much in the selected currency has to be paid to fully pay off the sales ticket.
- Open your shift with floats in different currencies.
- Close your shift and view the amounts received in multiple currencies.
