

SERIAL NUMBER TRACKING FUNCTIONALITY

SIMMS Serial Number Tracking system manages an unlimited amount of serial numbers from the time they are received into inventory until the time they are issued. This information is permanently recorded in the system, allowing inventory control personnel access to a wealth of historical and validation information.

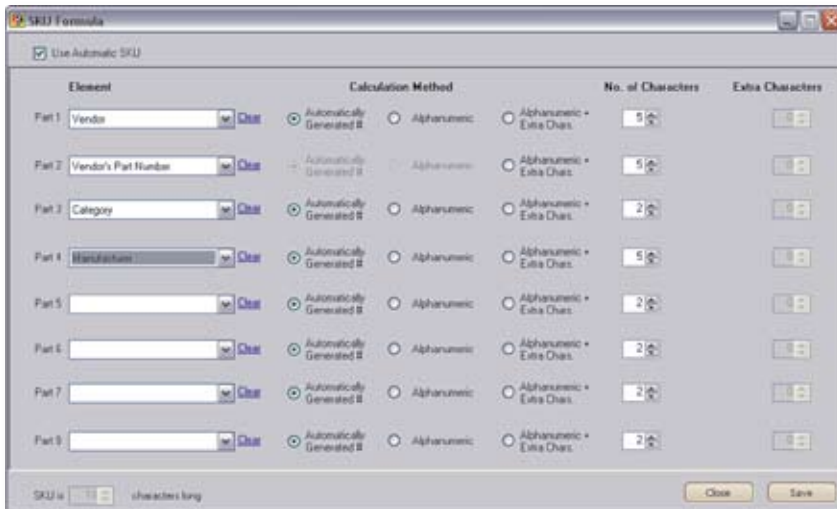

The information maintained by the Serial Number Tracking system is extremely helpful when returning a defective item to your vendor or when verifying a returned item from your customer. There will be no more endless searching through filing cabinets when you have the SIMMS Inventory Management system. Instead, the information is right at your fingertips, saving you both time and money.

WHAT SIMMS CAN DO FOR YOUR BUSINESS

- Gives you complete control of your stock
- Improve returns productivity
- Easy to use

The Inventory Software you can rely on
